

Google Ads Campaign Setup Report

Search Campaign Walkthrough — "Urban Fashion Website Traffic 1"

■ **DEMO REPORT** — This is not a real client report. All data and figures shown are for demonstration purposes only, created by me as a sample walkthrough.

Report Type	Campaign setup walkthrough (demo)
Platform	Google Ads
Prepared by	Pranay Gavaskar
Date	September 11, 2026
Purpose	Illustrate a sample Google Ads Search campaign build, from objective selection through to publishing.

This report documents the step-by-step configuration of a sample Google Ads Search campaign for a fictitious "Urban Fashion" online store — covering objective, targeting, budgeting, keywords, ad copy, and the final publish step. It is intended purely as a demonstration of the campaign-building workflow and does not reflect a live or billed advertising account.

1. Account Overview

The account overview shows the campaign 'Website traffic-Search-1' with a daily budget of Rs. 500.00. At this stage, the diagnostics panel flags 3 of 3 issues preventing ads from showing, since the campaign had just been published and impressions had not yet started.

Figure 1: Campaign overview and performance diagnostics panel.

2. Objective and Campaign Type

Website traffic was chosen as the objective, since the goal was to drive the right visitors to the store's website. Among the available campaign types, **Search** was selected to reach users with text ads directly on Google Search results.

The image shows two side-by-side screenshots from the Google Ads campaign setup interface. The left screenshot, titled 'What's your campaign objective?', displays a grid of objective options. The 'Website traffic' option is selected, which is described as 'Get the right people to visit your website'. The right screenshot, titled 'Select a campaign type', shows a grid of campaign types. The 'Search' option is selected, described as 'Drive website traffic from Google Search with text ads'. Other visible options include Performance Max, Demand Gen, Video, Display, and Shopping.

Figure 2–3: Objective selection (left) and campaign type selection (right).

2.1 Campaign Name and Destination

The campaign was named **"urban fashion website traffic 1"**, with the destination set to the store's landing page.

The image shows a screenshot of the Google Ads campaign setup interface. The 'Campaign name' field is filled with 'urban fashion website traffic 1'. Below it, the 'Select the ways you'd like to reach your goal' section shows a destination URL: 'https://pranaygavaskar.github.io/'.

Figure 4: Campaign name and landing page URL.

3. Bidding Strategy

The bidding focus was set to **Maximize conversions**, with the customer acquisition setting left at its default — bidding equally for new and existing customers.

The screenshot shows a settings interface with two main sections: 'Bidding' and 'Customer acquisition'. The 'Bidding' section has a dropdown menu set to 'Maximize conversions' and a note about alternative strategies. The 'Customer acquisition' section has a checkbox for 'Only bid for new customers' which is unchecked, with a note explaining the default behavior. A 'Next' button is at the bottom right.

What do you want to focus on? ⓘ

Maximize conversions ▾

Alternative bid strategies like portfolios are available in settings after you create your campaign

Customer acquisition

☐ Only bid for new customers

Your campaign will be limited to only new customers, regardless of your bid strategy

By default, your campaign bids equally for new and existing customers. However, you can configure your customer acquisition settings to optimize for acquiring new customers. [Learn more about customer acquisition](#)

4. Campaign Settings

4.1 Networks | 4.2 Locations

Both the Search Partners and Display Networks were kept enabled to extend reach. Location targeting was narrowed to Mumbai city, Mumbai City district, and Mumbai Suburban district — a combined reach of roughly 40 million people.

Figure 6–7: Network settings (left) and location targeting (right).

4.3 Languages

English, Marathi, and Hindi were selected to match the languages spoken by the target audience in the Mumbai region.

Figure 8: Language targeting.

5. AI Max for Search Campaigns

AI Max was enabled with text customization turned on, allowing Google AI to expand keyword matching and tailor ad copy and landing pages to each searcher's intent. Google indicates advertisers typically see about 14% more conversions or conversion value at a similar CPA/ROAS when this is active.

Figure 9: AI Max asset optimization settings.

6. Keyword Research and Selection

Using the landing page URL and product category ("urban fashion store"), Google Ads generated keyword suggestions. A total of 36 keywords were entered, including *urban fashion*, *trendy urban clothing*, *streetwear clothing*, and *affordable fashion online*.

The screenshot shows the Google Ads Keyword Planner interface. At the top, there's a 'Keywords' section with a dropdown arrow. Below it, the 'Get keyword suggestions (optional)' section explains that Google Ads can find keywords by scanning a web page or seeing what's working for similar products or services. It includes a 'Final URL' field with the value 'https://pranavgavaskar.github.io/' and an 'Enter products or services to advertise' field with the value 'urbanfashion store'. A blue box highlights the 'urbanfashion store' input. Below this is a link to 'Update keyword suggestions'. The 'Enter keywords' section explains that keywords are words or phrases used to match ads with search terms. It features a list of 11 keyword suggestions: 'urban fashion', 'urban fashion store', 'trendy urban clothing', 'stylish clothes online', 'urban wear for men', 'urban wear for women', 'trendy clothes online', 'affordable fashion online', 'streetwear clothing', and 'buy urban clothes online'.

Update keyword suggestions

Enter keywords
Keywords are words or phrases that are used to match your ads with the terms people are searching for

- urban fashion
- urban fashion store
- trendy urban clothing
- stylish clothes online
- urban wear for men
- urban wear for women
- trendy clothes online
- affordable fashion online
- streetwear clothing
- buy urban clothes online

Figure 10: Keyword suggestions and keyword list.

7. Ad Creation

The final URL was set, and the ad builder recommended at least 5 headlines to strengthen ad performance, with a live preview shown alongside the editing panel.

Figure 11: Ad panel with final URL and live ad preview.

7.1 Headlines and Descriptions

Headlines were drafted to include recommended keywords, e.g. "Shop Trendy Urban Fashion" and "Shop the Latest Trends." Descriptions highlighted the product offering, e.g. "Discover trendy urban fashion for everyday style. Shop the latest looks online today."

Figure 12–13: Headline entries (left) and description entries (right).

8. Sitelink Extensions

Sitelinks were added to direct users to specific pages — Best Sellers, New Arrivals, and Shop Men's Fashion — giving searchers more direct entry points into the site.

Figure 14: Sitelink extensions.

9. Budget

Google Ads presented three suggested average daily budgets. The recommended option of **Rs. 2,141.41/day** was selected as a custom budget.
