

META ADS MANAGER

Campaign Setup Report

Urban Style Fashion — Traffic Campaign

Demo Project Walkthrough | Step-by-step Documentation

Prepared: August 2026

Process Overview

This report documents the complete workflow followed to build a demo advertising campaign in Meta Ads Manager, from campaign creation through to publishing. The steps below mirror the exact sequence used in the platform:

1. Campaign
2. Objective
3. Budget
4. Audience
5. Placements
6. Creative
7. Tracking
8. Review
9. Publish

Campaign Setup

The campaign was created under the name "Urban Style Fashion". Meta Ads Manager's campaign score indicator confirmed a perfect score of 100, meaning the recommended setup was being used throughout campaign creation.

- Campaign name: Urban Style Fashion
- Structure: 1 Ad set → 1 Ad
- Status: In draft
- Live video ad setting: Off (standard setup used)

Fig 1. Campaign name and campaign details screen with a Campaign Score of 100.

Campaign Objective

The campaign objective determines what Meta optimises delivery for. For this demo, the objective selected was Traffic, using the standard Auction buying type.

- Buying type: Auction
- Campaign objective: Traffic

Fig 2. Campaign details panel showing Buying Type (Auction) and Objective (Traffic).

Budget & Bid Strategy

A campaign-level budget was configured so Meta could automatically distribute spend across the best opportunities in the campaign (Advantage+ campaign budget).

- Budget strategy: Campaign budget (Advantage+)
- Daily budget: ₹1,000.00 INR
- Maximum daily spend: ₹1,750.00
- Maximum weekly spend: ₹7,000.00
- Campaign bid strategy: Highest volume

Fig 3. Budget strategy configuration — daily budget of ₹1,000 with Highest Volume bid strategy.

Audience Targeting

Audience controls were configured at the ad set level to define who the ads would be shown to, combining location, age, language and interest-based targeting.

- Location: Mumbai, Maharashtra (+40 km radius), India
- Minimum age: 18, including WhatsApp users of unknown age
- Languages: Hindi, Marathi, English (All)
- Age range (custom audience): 18–45
- Gender: All
- Detailed targeting / Interests: Clothing, Fashion and style (retail), Street fashion

Devices & Placements

All devices were selected, and placements were customised across Meta's platform family to maximise delivery while keeping asset customisation enabled.

- Devices: All devices
- Platforms enabled: Facebook, Instagram, Audience Network, WhatsApp
- Platform disabled: Messenger, Threads
- Asset customisation: 19 of 20 supported placements enabled
- Placements included: Feeds, Stories/Status/Reels, In-stream ads for Reels, Search results, and more

The screenshot shows the 'Devices & Placements' configuration for an ad set named 'New Traffic ad' under the campaign 'Urban Style FashionU1'. The interface is divided into several sections:

- Devices:** Set to 'All devices'.
- Platforms:**
 - Facebook: ☒
 - Instagram: ☒
 - Audience Network: ☒
 - Messenger: ☐
 - WhatsApp: ☒
 - Threads: ☐
- Asset customisation:**
 - 19/20 placements that support asset customisation
 - [Select all](#)
- Placements:**
 - ☒ Feeds ⓘ
 - ☐ Stories, Status, Reels ⓘ
 - ☒ In-stream ads for reels ⓘ
 - ☒ Search results ⓘ

On the right side, there is a sidebar with two main sections:

- Advantage+ suggestion:** 'You could get 10% more reach with Advantage+ for 1 ad set' (+40 points). Includes a link to 'About Advantage+' and an 'Apply now' button.
- Audience definition:**
 - Current setting: 'Broad' (indicated by a red bar).
 - Text: 'Your audience is broad. Broad audiences can improve the chances you find a wider range of people likely to respond.'
 - Option: 'Narrow' (indicated by a yellow bar).
 - Estimated audience size: 1

Fig 7. Platform and placement selection across Facebook, Instagram, Audience Network and WhatsApp.

Ad Identity, Destination & Creative

The ad's identity (Page/profile), destination URL, and creative assets were configured to complete the ad build.

- Facebook Page: UrbanStyle Fashion
- Instagram profile: Uses Facebook Page
- WhatsApp number: Uses Facebook Page
- Destination: Website — www.urbanstylefashion.com
- Browser add-on: None
- Creative setup: Media added (image); Meta suggested duplicating the ad with a video to improve conversions

Identity

Conversion Tracking

A tracking configuration step allowed conversion events to be selected for the ad account's dataset, alongside optional URL parameters for measurement. The live ad preview also became visible at this stage.

- Website events: Default ad account conversion dataset applied
- App events / Offline events: Available but not configured for this demo
- URL parameters: Not set (optional key1=value1&key2=value2 format supported)
- Live ad preview: UrbanStyle Fashion ad with "Get offer" call-to-action shown on the right panel

Fig 11. Tracking configuration with a live preview of the final ad creative.

Review Before Publishing

Before publishing, the full ad structure (Campaign → Ad set → Ad) was checked in the Ads Manager table view to confirm delivery status, budget source and creative were all correctly linked.

- Structure confirmed: 1 Campaign → 1 Ad set → 1 Ad
- Ad name: New Traffic ad
- Delivery status: In draft
- Budget: Using campaign budget
- Toggle: Ad enabled and ready for review

Final Review & Publish

The final step in Ads Manager is to review campaign delivery in the reporting table and publish the ad. At the time of this report, the ad was verified as correctly configured and left in draft status, ready to be published.

Fig 12. Ads Manager reporting view confirming the ad "New Traffic ad" is in draft and ready to publish.

Once reviewed, clicking Publish in Ads Manager would move the ad from Draft to In Review, after which Meta processes the ad for policy compliance before it goes live and starts spending against the configured daily budget.

Campaign Summary

A consolidated summary of the key configuration values used across this demo campaign:

Field	Value
Campaign Name	Urban Style Fashion
